**2 . ACCOUNTING STANDARDS AND ACCOUNTING SYSTEM****21 . Fiscal year, accounting currency unit**

The Corporation's accounting period starts on January 1 and ends on December 31 of each year.

The accounting currency unit is Vietnamese Dong (VND)

**22 . Accounting Standards and System***Accounting system*

The Corporation applies the Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated December 22, 2014, of the Ministry of Finance, Circular No. 53/2016/TT-BTC dated March 21, 2016, amending and supplementing some provisions of Circular No. 200/2014/TT-BTC, and Circular No. 202/2014/TT-BTC guiding the preparation and presentation of consolidated financial statements

*Declaration of adherence to Accounting Standards and Accounting system*

The Corporation adheres to the Vietnamese Accounting Standards and related implementation guidance issued by the State. The financial statements are prepared and presented in compliance with all provisions of each standard, guidance circular, and the currently applied corporation accounting regulations.

**23 . Basis for Preparing Consolidated Financial Statements**

The consolidated financial statements of the Corporation are prepared by consolidating the standalone financial statements of the Corporation and its controlled subsidiaries. Control is achieved when the Corporation has the ability to direct the financial and operational policies of the investees to benefit from their operations.

The financial statements of subsidiaries are prepared using consistent accounting policies with those of the Corporation. If necessary, adjustments are made to the subsidiaries' financial statements to ensure consistency in accounting policies applied across the Corporation and its subsidiaries.

The business performance of subsidiaries acquired or disposed of during the period are reflected in the consolidated financial statements from the acquisition date or until the disposal date

Balances, income, and major expenses, including unrealized gains or losses arising from intercompany transactions, are eliminated during consolidation.

*Other Accounting Methods for Consolidated Financial Statements**Non-controlling interest*

Non-controlling interest represents the equity in the profit or loss and net assets of subsidiaries not held by the Corporation.

**24 . Financial instruments***Initial recognition**Financial assets*

The financial assets of the Corporation include cash and cash equivalents, trade receivables and other receivables, loans, and short-term and long-term investments. At initial recognition, financial assets are measured at acquisition cost/issue price plus directly attributable costs.

*Financial liabilities*

Financial liabilities of the Corporation include borrowings, trade payables, and other payables, as well as accrued expenses. At initial recognition, financial liabilities are measured at issue price plus directly attributable costs.

*After initial recognition*

There are currently no specific regulations on the remeasurement of financial instruments after initial recognition.

**25 . Conversion of financial statements prepared in foreign currency to Vietnamese Dong (VND).**

---

Financial statements prepared in foreign currency are converted to financial statements prepared in Vietnamese Dong (VND) using the following exchange rates: assets and liabilities are converted at the end-of-period exchange rate, owner's equity is converted at the exchange rate on the date of investment, and the income statement and cash flow statement are converted at the average exchange rate for the accounting period.

## 26 . Foreign currency transactions

The exchange rate used to convert foreign currency transactions is the actual exchange rate ruling as at the time of these transactions. The actual exchange rates applied to foreign currency transactions are as follows:

- For the foreign currency trading contract : the exchange rate stipulated in the contracts of trading foreign currency between the Group and the Bank
- For capital contribution made or received: the buying rate of the bank where the Corporation opens its account to receive capital contributed from investors as of the date of capital contribution.
- For receivables: the buying rate ruling as at the time of transactions of the commercial bank where the Corporation designates the customers to make payments
- For payables: the selling rate ruling as at the time of transactions of the commercial bank where the Corporation supposes to make payment.
- For acquisition of assets or immediate payments in foreign currency (not included into payable accounts): the buying rate of the commercial bank where the Corporation makes payments.

The exchange rates used to re-evaluate the ending balances of monetary items in foreign currencies are determined according to the following principles:

- For monetary items in foreign currencies classified as other assets: Apply the foreign exchange buying rate of the commercial bank where the Corporation frequently conducts transactions
- For foreign currency deposits: the buying rate of the bank where the Corporation opens its foreign currency account.
- For monetary items in foreign currencies classified as other liabilities: Apply the foreign exchange selling rate of the commercial bank where the Corporation frequently conducts transactions

All actual exchange differences arising during the period and differences from revaluing the balances of monetary items denominated in foreign currencies at the end of the period are recorded in the income statement of the accounting period.

## 27 . Cash and cash equivalents

Cash includes cash on hand, cash in funds, demand deposits at banks, and cash in transit.

Cash equivalents are short-term investments with original maturities not exceeding 03 months, high liquidity, easy convertibility to cash, and minimal risk of value changes.

## 28 . Financial investments

*Trading securities* are initially recognized in the accounting books at cost, which includes the purchase price plus any associated acquisition costs (if applicable), such as brokerage fees, transaction fees, information service fees, taxes, and bank charges. After initial recognition, trading securities are measured at cost less any allowance for devaluation of trading securities. Upon disposal or transfer, the cost of trading securities is determined using the weighted-average method.

*Held-to-maturity investments* include term deposits held until maturity for the purpose of earning periodic interest, and other investments held to maturity

*Investments in subsidiaries, joint ventures and associates* acquired during the period are recognized by the acquirer at the acquisition date and measured at the investment cost, with accounting procedures applied in accordance with the standards for "Business Combinations" and "Investments in joint ventures, associates." In the Consolidated Financial Statements, investments in associates are accounted for using the equity method.

*Investments in equity instruments of other entities* include investments where the Corporation has no control, joint control, or significant influence over the investee. The initial carrying value of these investments is measured at cost. After initial recognition, their carrying value is measured at cost less any allowance for devaluation of the investment.

Provisions for investment devaluation are established at the end of the period based on the following criteria:

- For trading securities investments: The provision is based on the difference between the cost of investments recorded in the accounting books and their market value at the time the provision is established, if the cost exceeds the market value.
- For long-term investments (excluding trading securities) where the Corporation does not have significant influence over the investee: If the investment is in listed shares or its fair value can be reliably determined, the provision is based on the market value of the shares. If the fair value cannot be determined at the reporting date, the provision is based on the financial statements of the investee at the time the provision is established.
- For held-to-maturity investments: The provisions/allowances for doubtful debts are based on recoverability, and are made in accordance with legal regulations.

## 29 . Receivables

Receivables are tracked in detail based on their maturity, counterparties, type of currency, and other factors as required for the Corporation's management purposes.

Provisions/allowances for doubtful debts are made for: overdue receivables as stated in economic contracts, loan agreements, contract commitments, or debt agreements; and receivables not yet due but deemed unlikely to be collected. Provisions for overdue receivables are based on the original payment terms in the sales contract, excluding any extensions agreed upon by the parties. Provisions for receivables not yet due are applied when the debtor is bankrupt, undergoing dissolution procedures, missing, or has fled.

## 210 . Inventories

Inventories are initially recognized at cost, which includes purchase costs, processing costs, and other directly attributable costs incurred to bring the inventories to their present location and condition. After initial recognition, at the time of preparing the financial statements, if the net realizable value of inventories is lower than their cost, inventories are recorded at the net realizable value.

The value of inventories is determined using the weighted-average method.

Inventories are accounted for using the perpetual inventory system

Method for determining the value of work-in-process inventories at year-end:

- For construction activities: Construction-in-progress costs are accumulated by unfinished projects or projects for which revenue has not yet been recognized, corresponding to the volume of unfinished work at year-end.
- Đối với hoạt động sản xuất: Chi phí sản xuất kinh doanh dở dang được tập hợp theo chi phí phát sinh thực tế cho từng loại sản phẩm chưa hoàn thành.

Provisions for inventory devaluation are made at year-end based on the difference between the cost of inventories and their net realizable value when the cost exceeds the net realizable value.

## 211 . Fixed assets

Tangible and intangible fixed assets are initially recognized at cost. During use, tangible and intangible fixed assets are recorded at their historical cost, accumulated depreciation, and net book value.

Finance leased fixed assets are recorded at cost based on fair value or the present value of the minimum lease payments (whichever is higher), plus any direct initial costs related to the finance lease activity (excluding VAT). During usage, the finance leased fixed assets are recorded at cost, accumulated depreciation, and remaining value. Depreciation of finance leased fixed assets is calculated based on the lease term as per the contract and is included in the production and business expenses to ensure full capital recovery.

Depreciation of fixed assets is calculated using the straight-line method over the estimated useful lives as follows:

- Buildings and structures	06 - 25 years
- Machinery and equipment	06 - 12 years
- Vehicles	06 - 10 years
- Office equipment	03 - 08 years
- Other fixed assets	03 - 08 years
- Perennial plantations	06 - 15 years
- Land use rights with a definite term	Over the term of land use rights
- Land use rights with indefinite term	No depreciation
- Management software	03 - 08 years

Investment properties are initially recognized at cost.

For investment properties used for operating leases, they are recorded at historical cost, accumulated depreciation, and residual value. Depreciation is calculated using the straight-line method over the estimated useful lives as follows

- Buildings and structures	8 - 50 years
- Industrial park infrastructure	10 - 45 years

## 212 . Business Cooperation Contract (BCC)

A Business Cooperation Contract (BCC) is an agreement between two or more parties to jointly carry out economic activities without establishing a separate legal entity. This activity can be jointly controlled by the contributing parties as per the joint venture agreement or controlled by one of the participating parties.

## 213 . Prepaid expenses

Expenses incurred that relate to production and business activities over multiple accounting periods are recorded as prepaid expenses and gradually allocated to business results in subsequent accounting periods.

The calculation and allocation of long-term prepaid expenses into production and business costs for each accounting period are based on the nature and scale of each expense type to select an appropriate allocation method and basis. Prepaid expenses are allocated to production and business costs using the straight-line method.

Business goodwill arising from the equitization of state-owned enterprises is amortized over a maximum of 10 years, following the guidelines in Circular No. 138/2012/TT-BTC dated August 20, 2012, on the allocation of goodwill value for joint-stock companies converted from state-owned enterprises.

## 214 . Payables

Payables are tracked according to payment terms, creditors, currency types, and other factors as required by the company's management.

## 215 . Borrowings and finance lease liabilities

The value of finance lease liabilities is the total payment calculated as the present value of the minimum lease payments or the fair value of the leased asset.

Borrowings and finance lease liabilities are monitored for each creditor, loan agreement, and repayment term. For loans and liabilities in foreign currencies, they are tracked in detail by the original currency.

## 216 . Borrowing costs

Borrowing costs are recognized as production and business expenses in the year they are incurred, except for borrowing costs directly related to the acquisition, construction, or production of qualifying assets, which are capitalized into the asset's value in accordance with the conditions specified in Vietnam Accounting Standard No. 16 "Borrowing Costs". Furthermore, interest on specific loans for the construction of fixed assets or investment properties is capitalized, even if the construction period is under 12 months.

#### 217 . Accrued expenses

Accrued expenses for goods and services received from suppliers or provided to customers during the reporting period but not yet paid are recorded as production and business costs for the reporting period.

Accrued expenses are recognized in the production and business costs of the year in accordance with the matching principle between revenue and related expenses incurred. The accrued expenses are settled based on the actual costs incurred. Any difference between the provisions and the actual costs is reversed.

#### 218 . Provisions

Provisions are recognized only when the following conditions are met:

- The company has a present obligation (legal or constructive) arising from a past event.
- It is probable that an outflow of economic benefits will be required to settle the obligation.
- A reliable estimate of the amount of the obligation can be made

The recognized value of a provision is the best estimate of the expenditure required to settle the present obligation at the end of the financial year.

Only expenses related to the initially established provision may be offset against that provision.

Provisions are recognized as production and business costs for the financial year. Any unused provision established in the prior reporting period that exceeds the required provision for the current reporting period is reversed and recorded as a reduction in production and business costs, except for excess provisions for construction warranties, which are reversed into other income in the financial year.

#### 219 . Unearned revenue

Unearned revenue consists of advance payments received from customers, such as prepaid amounts for one or multiple accounting periods related to asset leases.

Unearned revenue is recognized as revenue from sales of goods and services in amounts allocated to each accounting period.

#### 220 . Owner's equity

Owner's equity is recognized based on the actual contributed capital of the owners.

Share premiums reflects the difference between the par value, direct costs related to share issuance, and the issuance price of shares (including the re-issuance of treasury shares). This difference can be positive (if the issuance price exceeds the par value and direct costs) or negative (if the issuance price is below the par value and direct costs).

Other equity funds reflect equity formed from business results, donations, grants, asset revaluations (if permitted to adjust the owner's contributed capital).

Retained earnings reflect the net income (or loss) after corporate income tax and the allocation of profit or loss. Distribution of profit is carried out when the undistributed profit after tax does not exceed the amount shown on the consolidated financial statements after excluding gains from bargain purchase transactions. If dividends or profits are paid beyond the undistributed profit, they are recognized as a reduction of contributed capital. Undistributed profit after tax may be distributed to investors proportionally to their capital contributions after approval by the General Meeting of Shareholders and deduction of statutory reserves as per the company's charter and applicable laws.

Dividends payable to shareholders are recognized as liabilities on the company's Balance Sheet after the Board of Directors has approved the dividend distribution.

## 221 . Revenue

### *Revenue from sales of goods*

Revenue from sales of goods are recognized when all the following conditions are satisfied:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer.
- The Corporation no longer retains managerial involvement or control over the goods sold
- Revenue can be measured reliably.
- The Corporation has received or will receive economic benefits from the sales transaction;
- Able to determine the costs related to the sales transaction

### *Revenue from service provisions*

Revenue from service provisions are recognized when all the following conditions are satisfied:

- Revenue can be measured reliably.
- There is a possibility of obtaining economic benefits from the service provision transaction;
- The stage of completion of the transaction at the Balance Sheet date can be measured reliably.
- The costs incurred and to be incurred to complete the transaction can be measured reliably.

The stage of completion is determined using the percentage-of-completion method.

### *Revenue from sales of real estate*

Revenue from sales of real estate are recognized when all the following conditions are satisfied:

- The real estate has been fully completed and handed over to the buyer, and the Corporation has transferred the risks and benefits associated with the ownership of the real estate to the buyer;
- The Corporation no longer retains managerial involvement or control over the real estate.
- Revenue can be measured reliably.
- The Corporation has received or will receive economic benefits from the real estate sales transaction;
- Determine the costs related to the real estate transaction.

For subdivided land real estate where the plots have been transferred to the customers, the Corporation can recognize revenue for the sold land plots when the following conditions are met simultaneously:

- Risks and rewards related to the land use rights have been transferred to the buyer.
- Revenue can be measured reliably.
- Determine the costs related to the land plot sale transaction.
- The Corporation has received or will receive economic benefits from the land plot sale transaction;

### *Revenue from construction contracts*

In the case where the construction contract stipulates that the contractor is paid based on the actual volume completed, when the results of the contract performance can be reliably determined and confirmed by the customer, the revenue and related expenses are recognized corresponding to the work completed and confirmed by the customer in the year reflected

### *Financial income*

Revenue arising from interest, dividends, profit sharing, and other financial income is recognized when both of the following two (2) conditions are met:

- There is a possibility of obtaining economic benefits from that transaction.
- Revenue can be measured reliably.

Dividends and profits are recognized when the Corporation gains the right to receive them.

## 222 . Sales deductions

Sales deductions include trade discounts, sales returns, and sales allowances arising during the year.

Trade discounts, sales allowances, and sales returns arising in the same year as the sale of goods and services are adjusted against the revenue of that year. In cases where goods and services were sold in previous years, but revenue deductions arise in subsequent years, the revenue reduction is recorded as follows: If the deductions occur before the issuance of the financial statements, they are adjusted in the financial statements of the year in which the report is prepared (the previous year). If the deductions occur after the issuance of the financial statements, they are recorded as a reduction in revenue for

#### 223 . Cost of sales

Cost of sales during the year is recognized in accordance with the revenue generated in the same period, ensuring The accrual of expenses to temporarily determine the cost of sales in real estate, if applicable, follows these principles

- Only accrue expenses that are included in the investment and construction budget but lack sufficient documentation for approval of the work volume.
- Only accrue expenses to temporarily calculate the cost of goods sold for real estate that has been completed and sold during the year, meeting the revenue recognition criteria.
- The accrued expenses and actual costs recognized as the cost of goods sold must align with the cost benchmarks based on the total estimated costs of the real estate sold (calculated by area).

#### 224 . Financial expenses

Financial expenses include:

- Expenses or losses related to financial investment activities;
- Borrowing costs
- Losses from the liquidation or transfer of short-term securities and transaction costs for selling securities
- Provisions for impairment of trading securities, provisions for losses on investments in other entities, losses on foreign currency sales, exchange rate losses, etc.

These items are recognized at the total amount incurred during the year without offsetting against financial income.

#### 225 . Corporate income tax

##### a) Deferred tax assets and Deferred tax liabilities

Deferred income tax assets are determined based on the total deductible temporary differences and unused tax losses or tax incentives carried forward to subsequent years. Deferred income tax liabilities are determined based on taxable temporary differences.

Deferred tax assets and liabilities are determined using the applicable corporate income tax rates, based on the tax rates and tax laws effective at the end of the financial year.

Deferred tax assets and liabilities are offset in the preparation of the balance sheet.

##### b) Current income tax expense and Deferred income tax expense.

Current corporate income tax expenses are determined based on taxable income for the period and the applicable tax rate for the current accounting period.

Deferred corporate income tax expenses are determined based on deductible temporary differences, taxable temporary differences, and the corporate income tax rate.

Do not offset current income tax expense with deferred income tax expense.

#### 226 . Related parties

Parties are considered related if one party has the ability to control or significantly influence the other in making decisions regarding financial and operating policies. Related parties of the Corporation include:

- Entities that directly or indirectly, through one or more intermediaries, control the Corporation, are controlled by the Corporation, or are under common control with the Corporation, including parent companies, subsidiaries, and associates.;
- Individuals who directly or indirectly hold voting rights in the Corporation and have significant influence over the Corporation, key management personnel of the Corporation, and close family members of these individuals;

- The entities directly or indirectly controlled by the individuals mentioned above, holding a significant portion of voting rights or having significant influence over these enterprises.

When assessing the relationships of related parties for the purpose of preparing and presenting the Consolidated Financial Statements, the Corporation prioritizes the substance of the relationship over its legal form
